■ Expected use

This manual describes as decentralized input and output modules for connecting to an industrial network.

■ Installation and start-up

Precautions!

Installation and start-up may only be performed by trained personnel. A qualified individual is one who is familiar with the installation and operation of the product and has the necessary qualifications to perform such operations. Any damage caused by unauthorized operation or illegal and improper use is not covered by the manufacturer's warranty. The equipment operator is responsible for ensuring that appropriate safety and accident prevention regulations are observed.

■ Corrosion resistance

Precautions!

FNI modules generally have good chemical and oil resistance. When used in corrosive media (e.g. high concentrations of chemicals, oils, lubricants, coolants and other material media (i.e. very low water content), these media must be checked before the corresponding application material compatibility. If a module fails or is damaged due to this corrosive medium, a defect claim cannot be made.

■ Dangerous voltage

Precautions!

Disconnect all power before using the device!

■General security

Debugging and inspection	Trouble	Owner/operator obligations	Expected use
Before debugging, read the user manual carefully.	If the defect or equipment failure cannot be corrected, the operation of the equipment must be stopped to avoid damage that may be caused by unauthorized use.	This equipment is an EMC Class A compliant product. This device produces RF noise.	The warranty and limited liability statement provided by the manufacturer does not cover damage caused by: ·Unauthorized
This system cannot be used in an environment where the safety of personnel depends on the functionality of the equipment.	Only after the housing is fully installed can the intended use be assured.	The owner/operator must take appropriate precautions to use this equipment.	·Improper use ·The instructions provided in the user manual explain the use, installation and handling of discrepancies
		This device can only use the power supply that matches this device, and can only connect cables approved for application.

	Red indicator	Communication abnormality

1.2 Mechanical connection

The modules are connected using 2 M4 bolts and 2 washers.
Isolation pads are available as accessories.

1.3 Electrical connections

1.3. 1 IO-Link interface(A-code)

Note:
Unused I/O port sockets must be covered with dust caps to meet IP67 protection rating.

2 Technical data

2.1. Size

2.2 Mechanical data

Shell material	Plastic
Housing rating according to IEC 60529	IP67 (only in plug-in or plug type)
IO-Link interface	A-Coded
Input port	M8(8*Female)
Size(W*H*D)	30mm*131mm*25.8mm
Installation type	2-Through hole mounting
Weight	About 107 g

2.3 Operating conditions

Operating temperature	-5°C ~ 70°C
Storage temperature	-25°C ~ 70°C

2.4 Electrical data

Voltage	18~30V DC, conform to EN61131-2
Voltage fluctuation	<1%
Total current	<800mA

2.5 IO-Link data

As shown in Table 1-1.

Surface 1-1

Data transmission baud rate	COM2 (38.4kbit/s)
Frame type	2.V
Minimum cycle time	2.2ms
Process data cycle time	2.2ms, corresponds to the minimum cycle time
Process data length	2

2.6 Process data/output data

Parameter data		0x40	0	Bit reversal	2	0000-FFFF	0x0000

The 0x40 setting bit is reversed: 0-bit is not reversed, 1-bit is reversed. For example, the external input is 0x0000. When 0x40 is 0x0000, the value is 0x0000 (not reversed). When 0x40 is 0xFFFF, the value is 0xFFFF (reverse).

2.9 Error
